

## THE DAWN OF A NEW ERA IN DISABILITY AWARENESS

For the longest time a differently abled child or individual has been viewed with a negative connotation. Nathaniel Julies death has shed a different light and perspective on this connotation and has brought the realization that different is not bad.

The vision behind the foundation is to create Disability Awareness, Education, Support and Training for the Communities, Families and the public at large with regards to conditions called Cerebral Palsy, Autism, Osteogenesis Imperfecta, Down Syndrome and other such conditions. The foundation is a Holistic Centre for all disabilities.

With the above in mind, we endeavour to use this tragedy as a platform to draw attention and awareness around those individuals who have been marginalized for too long.

The #JusticeForNathaniel campaign is but a starting point for us in ensuring that those **Silent Voice are Heard.**

It is not about politics but rather the person.  
It is not about the condition but rather plausible solutions and services.

Our reach is minimalistic in the greater scheme of things but we believe that with the right partners and support, we will provide families such as Nathaniel's and communities such as ours with the necessary assistance that they have so desperately sought after.

We can not change what has happened in the past but we strongly believe that meaningful collaborations with relevant stakeholders will give the families **The Roots To Rise** in order for us to improve the lives of those that are differently abled.
